Q.6) Write a C program to create and display Binary Tree.

```
#include  <stdio.h>
#include <stdlib.h>
struct node
{
   int data;
   struct node *left;
   struct node *right;
};
struct node* createNode(int data)
{
   struct node *newNode;
   newNode = (struct node*)malloc(sizeof(struct node));
   newNode->data = data;
   newNode->left = NULL;
   newNode->right = NULL;
   return newNode;
}
int main()
{
   struct node *root;
   root = createNode(1);
   root->left = createNode(2);
   root->right = createNode(3);
   root->left->left = createNode(4);
   root->left->right = createNode(5);
```

```
    printf("Binary Tree:\n\n");
    printf("       %d\n", root->data);
    printf("      / \\\n");
    printf("     %d   %d\n", root->left->data, root->right->data);
    printf("    / \\\n");
    printf("   %d   %d\n",
          root->left->left->data,
          root->left->right->data);
    return 0;
}
```

Output
